Universal Dragon™ Installation Guide:

This guide provides users with step by step instructions on how to install the Universal Dragon Drop software.

Requirements:
- 1.5GHz or greater processor (CPU)
- Windows 2000, Windows XP, or Windows Vista
- 650 MB Hard Drive space (you will need more as your libraries and projects expand)
- 512 MB RAM (1 MB preferred)
- Mouse, USB

The new Universal Dragon software requires the latest '.NET' and a Microsoft InstallShield update in order to ensure that the latest version of the software is installed. These updates require an internet connection during the installation process, as well as a licensed installation of Microsoft Windows 2000 or XP. If an internet connection is not present during installation you will not be able to install this version of Universal at this time.

Please note: The Microsoft '.NET' download can be very large (up to 70MB). If you do not have a fast internet connection this can take a very long time.

Installation:

1. Double click on the installation program.

2. The installation process will begin:
<table>
<thead>
<tr>
<th>3. Click on the Next button:</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Xantech Universal Dragon v2.3 - InstallShield Wizard" /></td>
</tr>
</tbody>
</table>

Note: If you do not have the .NET, Dragon Graphics, or Dragon Prerequisites on your computer, this will get installed first.

<table>
<thead>
<tr>
<th>4. The default installation path for Universal Dragon is ‘C:\Program Files\Xantech\Universal Dragon v2.3\’, if this is acceptable click Next. Otherwise click on the Change button and enter the location you wish to install Universal Dragon:</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Xantech Universal Dragon v2.3 - InstallShield Wizard" /></td>
</tr>
</tbody>
</table>

WARNING: this program is protected by copyright law and international treaties.
6. The installation will proceed showing the user the current Status:

7. After installation is complete, click on the Finish button. (If you wish to launch Dragon immediately, click on the checkbox labeled “Launch Xantech Universal Dragon v.2.3”):
8. The installation package may ask you to reboot your computer. Click Yes so that the installation process can be completed:

![Xantech Universal Dragon Installer Information]

You must restart your system for the configuration changes made to Xantech Universal Dragon to take effect. Click Yes to restart now or No if you plan to restart later.

| Yes | No |

9. After your computer reboots, the installation package will check to make sure that you have the latest version of Universal Dragon on your computer.

10. You can now run the Universal Dragon Drop software by double clicking the shortcut on your desktop:

![Universal Dragon v2.3]

Or selecting Universal Dragon from your start menu under the Xantech start folder.
