

Universal	This guide provides users with step by step instructions on how		
Uragon™ Installation Cuida:	to install the Oniversal Diagon Drop software.		
Requirements:	 1.5GHz or greater processor (CPU) Windows 2000, Windows XP, or Windows Vista 650 MB Hard Drive space (you will need more as your libraries and projects expand) 512 MB RAM (1 MB preferred) Mouse, USB 		
	 The new Universal Dragon software requires the latest '.NET' and a Microsoft InstallShield update in order to ensure that the latest version of the software is installed. These updates require an internet connection during the installation process, as well as a licensed installation of Microsoft Windows 2000 or XP. If an internet connection is not present during installation you will not be able to install this version of Universal at this time. Please note: The Microsoft '.NET' download can be very large (up to 70MB). If you do not have a fast internet connection this can take a very long time. 		
la stallation	1. Double click on the installation program
