Introducing the All-New  
**SUNFIRE** Theater Grand Media System

# “Listening to Bob Carver speak... is like watching Jack Nicklaus play golf.”

~Tom LeBlanc, CEPro, April 2008~

## HOW DID WE GET HERE IN THE FIRST PLACE?

The year was 1972. And a graduate student named Bob Carver was about to turn an ordinary classroom assignment into the beginning of an iconic brand of home audio products. That assignment — to build a machine that would simulate earthquakes — became the springboard for a four-decade run of innovative ‘firsts’ and ‘onlys’ that have continually raised the benchmark for the entire home audio industry. Bob’s history includes the launch of dozens of now legendary speakers, high performance amplifiers, preamps and one-of-a-kind receivers. Those earlier icons have lead to today’s newest heroes — the remarkable Theater Grand Media Series. Consisting of products that would have been unthinkable just a few years ago, each component in the line is perfectly matched to deliver true, Sunfire luxury at a whole new level. What’s more, every TGM Series component is Sunfire Optimized™ — meaning it is purpose-built to work best with any of our equally impressive speaker or electronics lines.

Welcome to the all-new Theater Grand Media System.

## Welcome to Sunfire.

**1965** Carver’s earliest years of validating the latest audio technologies and looking for unconventional approaches to amplifier design

**A brilliant 1080p interface provides instant access to your favorite movies and music.**

It's easy to get the same experience in up to 6 additional rooms — simply add a TGM-100C "client" for each location. So whether you're in the bedroom or playroom, you'll get the same high resolution interface and connectivity as you would in the home theater.

The Theater Grand Media system is the only server on the market that natively supports all current ELAN Touch Panels. Sunfire has worked closely with ELAN engineers to ensure seamless and intuitive control from the big screen to the small screen. The TGM is also compatible with HomeLogic and other leading control systems.

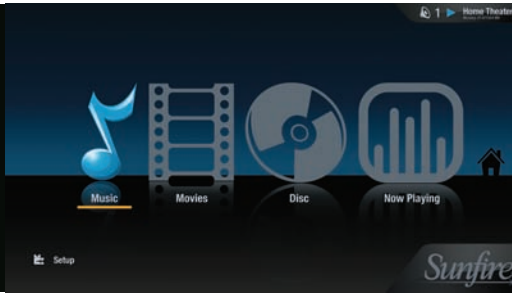

Your entire collection of music and movies —  
all at your fingertips.

*TGM-100C Media Client*

# No, you're not dreaming

Introducing The **SUNFIRE** of Media Servers

EASILY ACCESS YOUR FAVORITES USING AN INTUITIVE ON-SCREEN INTERFACE

*TGM-100 Media Server*

based, digital media servers. With its stunning design, hand-selected components and proprietary software, this remarkably advanced product leaves all the problems of PC-based servers behind. Simply insert a DVD or CD and within seconds its cover art and detailed information are downloaded via the internet. At the same time, the server begins recording your disc to enterprise-grade, TGM-Series hard drives. And a 1080p high-definition user interface provides instant, intuitive access to your media at the push of a button. Just sit back and enjoy beautiful video quality that mirrors that of the world's finest and most costly DVD players. There's just nothing else like it.

Any car you buy will get you where you need to go. Any watch will tell you the time. But, once you've driven the best set of wheels or worn the watch you've always dreamed about — you have become one of the select few to understand the value and pleasure of luxury. With this same train of thought in mind, we introduce the Sunfire Theater Grand Media System — the only system of its kind to deliver the luxury and performance that the name Sunfire symbolizes. Highly robust and purpose-built, the TGM Series is an expandable server/client and hard drive system for storing, managing and playing your entire collection of movies and music.

When it comes to Servers, the Sunfire TGM-100 represents the best technical thinking on the subject today and forever changes the playbook for home-

Are Safe As Money In The Vault

Introducing The **SUNFIRE** of Hard Drives

TGM-HD1  
1TB Hard Drive

TGM-HDC  
Hard Drive Chassis

MASSIVE STORAGE CAPABILITIES WITH UNPRECEDENTED RELIABILITY AND AUTOMATIC BACKUP

TGM-HDC  
Enterprise-Grade Hard Drive Chassis

How do you currently store your music and movies? Perhaps you've moved up from using a lot of shelf space, cabinets and cardboard boxes to using a PC-based approach? Well, while this certainly is progress — unfortunately, it is still the digital equivalent of the dark ages. Now, Sunfire has created enterprise-level hard drive solutions specifically designed to let you store — and easily access — the movies and music you love at the touch of a button. And when we say storage, we mean up to 6TB — 850 movies or 7,200 albums — and more if you wish, simply by adding additional storage to your original system as your needs require.

Of course, with all of that precious data stored in one device, backup is essential. That's why the TGM-HDC is built with the same dual-redundant

technology that banks and government agencies entrust with their most precious data. A dual-redundant architecture is an insurance policy of sorts — you buy it today in hopes that you never need it. But if you do, you'll be glad you have it. Plus, dual power supplies and network connections ensure your system is ready to play when you are. And if that's still not enough, consider too that every TGM Series hard drive is backed by one of the industry's most comprehensive buyer protection plans.

**Dual redundant backup means data security on par with major banks and government.**

All TGM Series components are built to such rigorous standards that we back the entire system with our exclusive 2-year limited warranty.

**2**year  
warranty

The TGM Series is part of Sunfire's award-winning family of products.

## SPECIFICATIONS

Sunfire

# TGM SERIES

TGM-100

## TGM-100 & TGM-100C

### FEATURES:

- Simple management of your entire music and movie collection
- Elegant 1080p graphical user interface
- Store up to 850 movies or 7,200 albums — and even more with system expansion
- Automatic metadata download including cover art
- Power scroll feature enables rapid navigation of extensive libraries
- Integrated web server enables full control via Macs and PCs
- Modular and scalable (server & client system) for up to 7 simultaneous, independent video zones
- Enterprise-level storage solutions available with remote monitoring
- TGM-100C Client extends capabilities to additional rooms in your home

### CONNECTIONS:

- HDMI v1.3a output (up to 1080p)
- Component output (up to 1080i)
- DVI output (touch panel interface only)
- S-Video and composite video outputs (480i only)
- Stereo RCA outputs
- Coax and optical digital audio outputs
- 2 x ESATA, 2 x USB 2.0, 1GB Ethernet
- IR input, bi-directional RS-232 port

### DESIGN:

- Designed and built without compromise to automotive reliability standards
- Highly reliable flash-based operating system, no internal hard disc drive
- Near silent operation (can be installed in-room)
- Discreet slot loading DVD drive
- Rack kit included

### VIDEO:

- Best-in-class, 1080p videophile experience through HDMI (plus 5.1 channel Dolby/DTS)
- Three independent, scalable user interfaces including dedicated Touch Panel video output

### AUDIO:

- Audiophile-grade performance with professional quality Wolfson® 192kHz/24-bit audio DACs
- 5.1 channel Dolby and DTS, plus 2-channel bitstreams supported

TGM-HDC

## TGM-HDC

### FEATURES:

- 3TB or 6TB options available
- Enterprise-level RAID6 storage solution (dual redundancy w/ 2 backup drives)
- Add a second TGM-HDC for additional storage
- Field-replaceable, hot swappable fans and PSU's for fast, efficient servicing without interrupting the user experience
- Remote diagnostics and reporting
- Rack kit included

### CONNECTIONS:

- 3 x 1GB Ethernet
- 2 x RS-232 (used for required uninterruptable power supply)

## TGM-HD1

### FEATURES:

- Perfect solution for smaller media collections
- 1Terabyte RAID 1 (2 x 1TB HDD, mirrored backup)
- ESATA connection to TGM-100

TGM-HD1
