

INSTALLATION INSTRUCTIONS

MRCREMRP

Multi-Room Controller Hand-held Remote

DESCRIPTION

The MRCREMRP (MRC Remote) is a specialized remote that is capable of interfacing with Xantech Multi-Room Controller products. This provides an added-value product perfect for any multi-room installation. The MRC Remote is designed to provide keypad control in an easy, handheld remote. In simple terms, it can be described as a held-held, multi-room controller keypad.

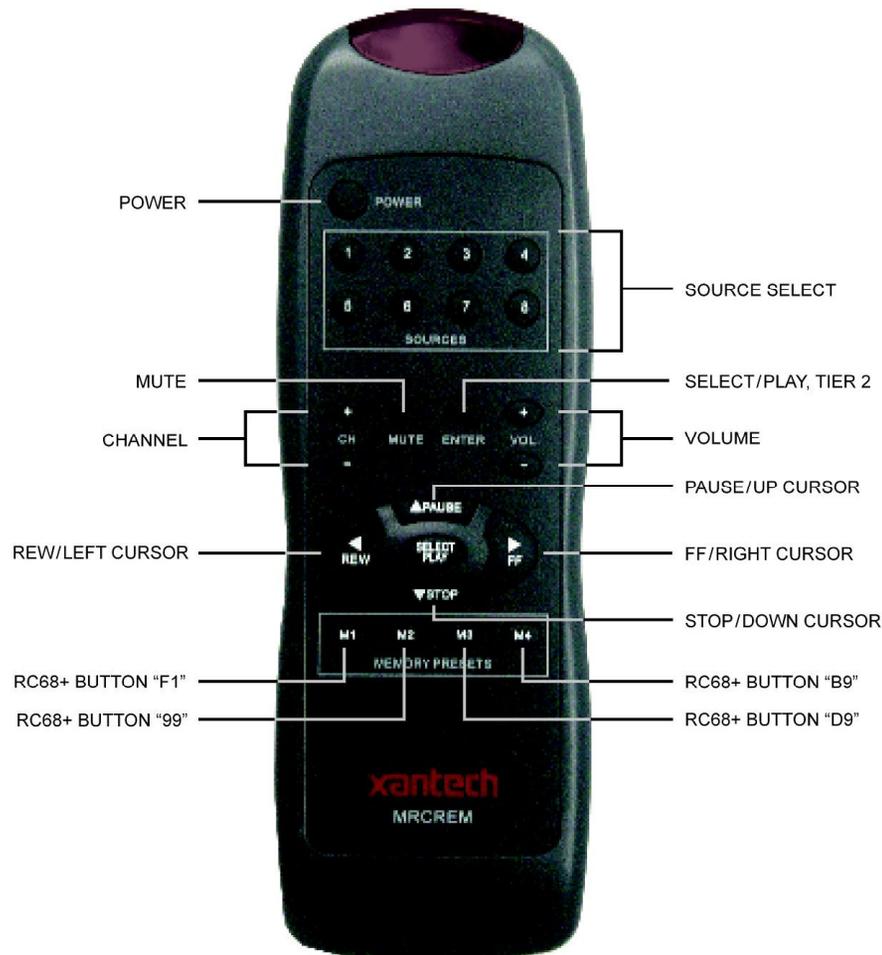

This remote needs absolutely no programming and will trigger any keypad macro stored within the following Xantech products.

▶ MRC44CTL
▶ MRC88CTL

▶ MRAUDIO4X4CTL
▶ MRAUDIO8X8CTL

▶ BXAUDIO4X4CTL

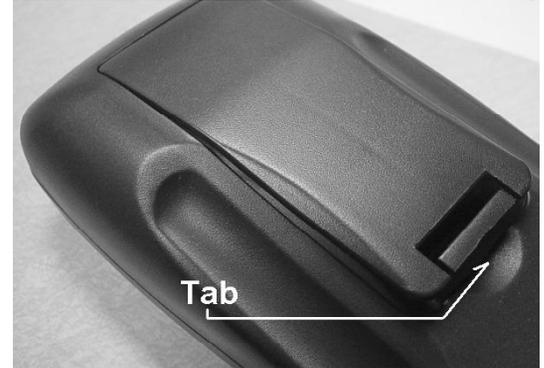

KEYPAD DESCRIPTIONS

QUICK START

Installing Batteries

1. Turn the unit over and remove the battery cover. Press the battery cover Tab in towards the battery cover and lift up.
2. Install 2 “AAA” batteries (Alkaline recommended). Be careful to observe correct polarity for each battery as shown and as marked on the inside of the battery compartment.
3. Reinstall battery cover.

Using the MRC Remote – MRC88CTL, MRAUDIO8X8CTL

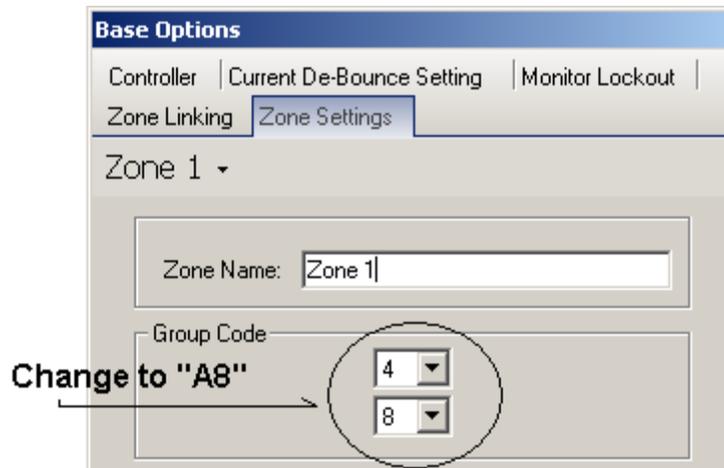

The MRC Remote is ready to be used with the MRC88CTL and MRAUDIO8X8CTL, group code “A8”.

Using the MRC Remote - BXAUDIO4X4CTL

The MRC Remote is ready to be used with the BXAUDIO4X4CTL. Similar to the MRC44 and MRAUDIO4X4CTL, the MRC Remote cannot use the source select buttons 5 thru 8. The BXAUDIO4X4CTL cannot be programmed to respond to buttons M1, M2, M3, M4, and ENTER (Play/Select Tier 2).

Using the MRC Remote – MRC44CTL, MRAUDIO4X4CTL

Before using the MRC Remote, the group code in the MRC44CTL and MRAUDIO4X4CTL must be changed. Open the Dragon-Drop IR software that is included with the MRC44CTL and MRAUDIO4X4CTL. Select each keypad’s Base Options and change the group code.

The MRC Remote can only use the first four source select buttons (1 thru 4).

Changing the MRC Remote Group Code

The MRC Remote has the ability to change group codes. This feature allows the capability to make the MRC Remote respond to specific zones only. To do this, remove the battery cover and the batteries. Using the chart below (Figure A), determine which group code you would like to use and cut the respective jumpers. Then, be sure to use the Dragon-Drop IR software to program the zones unique group code.

B	A	Group Code
Open	Open	08
Close	Open	88
Open	Close	28
Close	Close	A8

Default

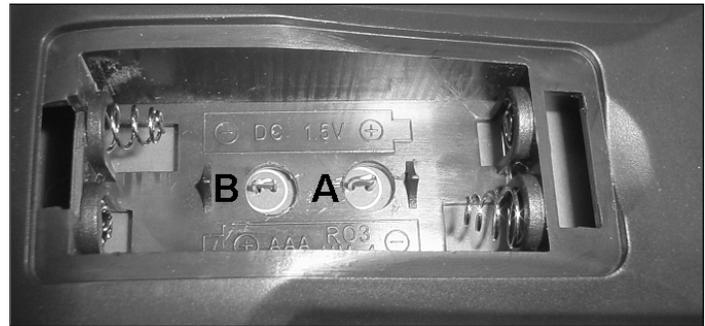

Figure A

Programming M1, M2, M3, M4 Buttons

To utilize the M1 thru M4 buttons, the multi-room controller must be programmed via Dragon-Drop IR software. The Dragon-Drop IR programming software comes with the MRC88/44 and MRAUDIO8X8/4X4 controllers. When the multi-room controller receives the M1, M2, M3, or M4 command from the MRCREM, the system will output a sequence of to-be-programmed commands. The programming procedure is identical to placing commands on the keypad. (NOTE: The BXAUDIO4X4CTL cannot be programmed to respond to buttons M1, M2, M3, and M4.)

1. Access the RC68 IR Command Macro window. Buttons M1, M2, M3, and M4 will trigger macros recorded under RC68 buttons F1, 99, D9, and B9 as shown in Figure B.
2. Select the RC68+ button that's corresponds with M1 through M4.
3. Open the palettes or internal commands for the devices to be controlled in the sequence.
4. Select the command that will be associated with button M1, M2, M3, or M4.

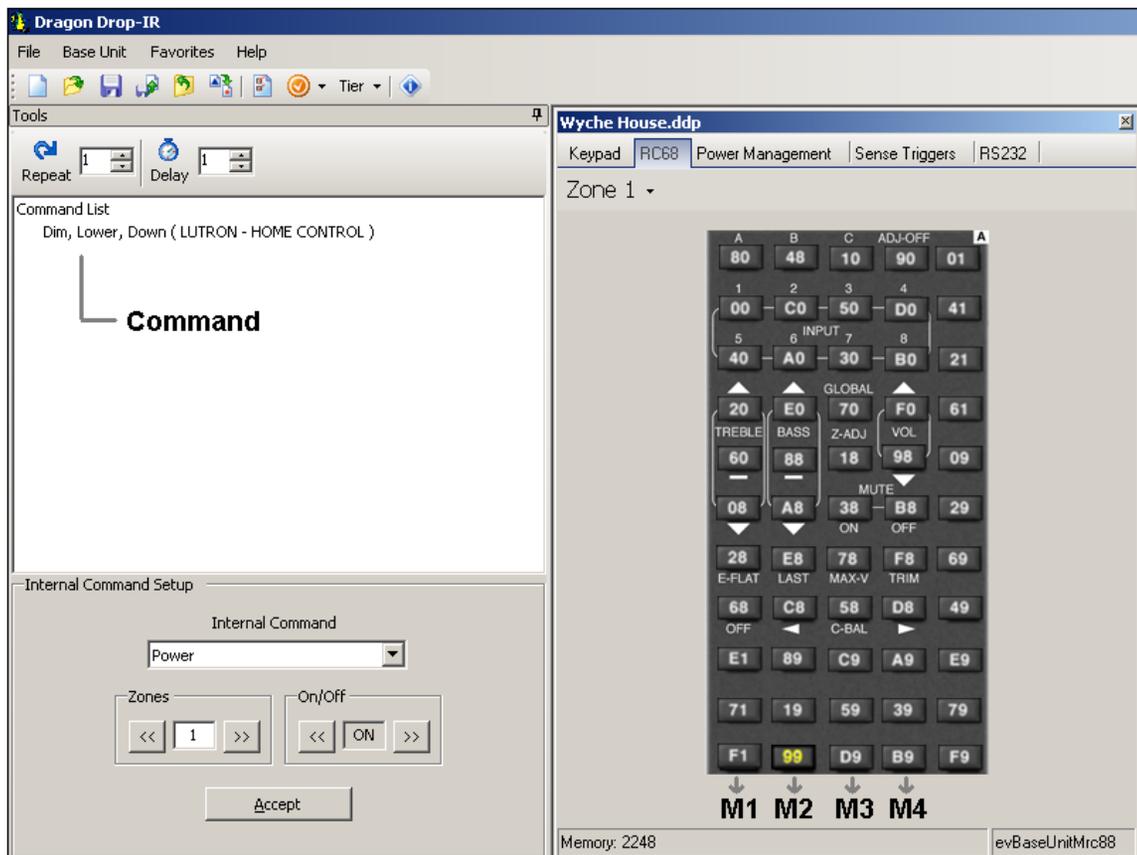

Figure B

Figure B shows the Dragon-Drop IR software. Here, button “99” on the RC68 is selected. The macro command list shows an internal command that will set the “bass” level to preset level. In this case, the preset level is maximum “bass” level 14. When the multi-room controller is programmed with this command sequence, the MRCREM will have the capability to change a room’s audio by simply pressing “M2”. This is an example how the MRCREM can be used to instantly control a room’s environment with one simple button press.

Additional information can be found on page 38 of the MRC44 and MRAUDIO4X4 installation instructions.

Additional information can be found on page 71 of the MRC88 and MRAUDIO8X8 installation instructions.
